

Juan José Wendler

Córdoba, Argentina · [linkedin](#) · [github](#) · [portfolio](#) · +54 3541 35 5745 · juanjoowendler@gmail.com

Information Systems Engineering student with experience in Full Stack development. Proficient in React, Node.js, Spring Boot, and Python. Strong in teamwork, problem-solving, and quickly learning new technologies. Passionate about improving my English skills.

PROJECTS

Car Agency: Backend System for Used Car Sales

Aug 2024 - Nov 2024

Developed a backend system to manage test drives, vehicle tracking, and security for a used car sales agency. Implemented real-time vehicle tracking, ensured safety by preventing entry into restricted zones, and developed reporting and notification systems. The system is built using microservices with an [API Gateway](#) and integrates external APIs for geographic data.

Interactive Voice Response (IVR) System

Mar 2023 - Nov 2023

Created an IVR system for credit card inquiry management. Initially built with [Python](#) and [PyQt5](#), it was later migrated to [Java with Spring Boot](#), and the frontend was updated to [React.js](#). The system includes features like automated responses, call auditing, and [Excel reporting](#), with data stored in [MySQL](#).

Node.js and React REST API for Resource Management

Mar 2024 - Jun 2024

Developed a REST API for resource management using [Node.js](#), [Express](#), and [Sequelize](#), with [SQLite](#) for the database. The project includes a React frontend for easy interaction with the API, supporting filtered searches and pagination. Utilized [Postman](#) for API testing and managed code with [GitLab](#) and [GitHub](#).
